

SKIN CANCER

is the most common
type of cancer
in the U.S.

1^{IN} 5

people will develop
skin cancer in
their lifetime.

SUNBURN

during childhood
is a major risk factor
for melanoma.

Skin cancer can be prevented,
and you can help. By protecting
children from the sun, you will
have a long-term, positive
impact on their health.

The Sunbeatables® Program

Ray and the Sunbeatables®: A Sun Safety Curriculum was created and developed by The University of Texas MD Anderson Cancer Center and disseminated by CATCH Global Foundation.

The evidence-based program introduces superhero characters, Ray and the Sunbeatables, who travel around the world using their superpowers of sun protection. Children participate in fun and engaging activities and learn the importance of protecting their skin year-round.

Access the free program at:

sunbeatables.org

CURRICULUM COMPONENTS

- Teacher's Guide (Pre-K, K-1)
- Curriculum Lessons (Pre-K, K-1)
